- **TOILETS**
- **CHANGING ROOMS**
- **PUBLIC TOILETS**
- **CAMPING GROUND ABLUTIONS**
- **FISH FACTORIES**
- **ANIMAL HOUSING AREAS**

DESCRIPTION

ECLIPSE has an outstanding ability to create a pleasant atmosphere in environments that are prone to malodours.

ECLIPSE contains a long lasting spicy deodorising perfume especially complexed to destroy amine type odours. This technology allows the product to "ECLIPSE" urine and ammonia type odours that are particularly offensive.

ECLIPSE finds use as a very pleasant smelling general purpose disinfectant and air freshener, however its outstanding utility is in creating a pleasant atmosphere in "difficult" areas. Thus ECLIPSE should be considered for all bathrooms, toilets, changing rooms, public toilets, camping ground ablutions, fish factories, and areas where animals are housed.

ECLIPSE contains greater than 1.5% alkylbenzyltrimethylammonium chloride sanitiser to kill and help prevent the regrowth of malodorous bacteria when used at the recommended dilution.

ECLIPSE contains complexed spicy perfume, non-ionic surfactants, food dyes, and greater than 1.5% alkylbenzyltrimethylammonium chloride. It may be identified by its clear light green appearance, neutral (7.0± 0.5) pH, and a minimum of 5.5% solids by RI.

DIRECTIONS FOR USE

- **DISINFECTING:** Dilute to 1.25% (1:80) in cold or warm water.
- **SANITISING:** Dilute to 5% (1:20) in cold or warm water, allow at least 10 minutes contact time before rinsing.
- **AIR FRESHENING:** Spray 5% ECLIPSE taking care not to inhale mist.

SAFETY INFORMATION

- **SKIN CONTACT:** Wash from skin with cold water.
- **INGESTION:** Do not induce vomiting; drink 2 glasses of milk, water or fruit juice. Call doctor.
- **EYES:** Flush for 15 minutes with cold water. Visit doctor.
