- **RESTAURANTS**

DESCRIPTION

FIRE DOG is a heavy duty oven and hot-plate cleaner for applications where there is not enough time to wait for the action of normal cleaners. The chemical activity is boosted to allow for quicker removal of fats and grease.

FIRE DOG can also be used as a drain and sewer cleaner / maintainer. It is safer to use as there is not the heat and agitation produced.

DIRECTIONS FOR USE

Do not use on aluminium or zinc. Avoid contact with linoleum, chrome, painted and varnished surfaces. Do not use with acids or other chemicals.

Squirt neat product to warm (NOT HOT) surface, making sure to spread evenly over surface. Do NOT atomise the product. Do NOT leave product in unmarked bottles or open containers. Leave surface, wetted with product, for a few minutes and then wipe surface with an absorbent cloth.

For food contacting surfaces, rinse surface with potable water. For very stubborn deposits of carbon, use of a scraper or abrasive griddle pad will facilitate their removal.

SAFETY INFORMATION

FIRE DOG is a caustic alkaline substance. Avoid contact with skin and eyes. Do NOT spray or atomise this product. Do NOT leave product in unmarked bottles or open containers. The following general First Aid procedures apply:

- If poisoning occurs, contact a Doctor or Poisons Information Centre.
- If in eyes, hold eyes open and flood with water for at least 15 minutes.
- If swallowed, do NOT induce vomiting. Give water to drink and seek medical attention.
- If skin contact occurs, remove contaminated clothing and wash skin thoroughly.
