

## 1. Identification of Substance and Company

Product Name: Handy Andy Regular  
 Other Names: None  
 HSNO Approval: HSR002530  
 Cleaning Products (Subsidiary Hazard) Group Standard 2006  
 Product Code: O4580, 741065, 741072  
 UN Number: Not Applicable  
 Hazchem Code: 1[T] (not required for signage)  
 Uses: Disinfectant, Cleaning Agent

### Company Details

Company: Clorox New Zealand Ltd  
 Address: Level8, Building 5,  
 Central Park  
 660-670 Great South Road  
 Penrose  
 Auckland 1061  
 New Zealand  
 Telephone Number: 0800 108 858  
 Emergency Telephone Number: Poisons and Hazardous Chemicals National Information Centre. Urgent information: 0800 764 766. Working hours: 03 479 7248

## 2. Hazard Identification

### Hazard Classifications

This product has been approved under the Hazardous Substances and New Organisms Act (HSNO, Approval HSR002530, Cleaning Product (subsidiary hazard) Group Standard 2006), and is classified as follows:

Classes 6.1E (oral), 6.3A, 8.3A, 6.5B, 9.1D	Harmful if swallowed, Skin irritant, Eye corrosive, Contact sensitiser, Harmful in the aquatic environment
---------------------------------------------------------	------------------------------------------------------------------------------------------------------------------------

Symbols:

**DANGER**

Degree of hazard:

### Other classifications

Not considered hazardous under other New Zealand legislation. Not a scheduled Poison in Australia.

### Hazard and Precautionary Statement

Hazard	
6.1E (oral)	May be harmful if swallowed
6.3B	Causes skin irritation.
8.3A	Causes serious eye damage.
6.5B	May cause an allergic skin reaction.
9.1D	Harmful to aquatic life.

Precautionary	<p>Keep out of reach of children.          Read label before use.          Wash hands thoroughly after handling.          Wear protective gloves/protective clothing.          Wear eye/face protection.          Avoid breathing vapours.          In case of inadequate ventilation wear respiratory protection.          Contaminated work clothing should not be allowed out of the workplace.          Avoid release to the environment.          If medical advice is needed, have product container or label at hand. Call a POISON CENTER or doctor/physician if you feel unwell.</p> <p>Further precautionary statements can be found in Section 4 – First Aid.</p>
---------------	------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

### 3. Composition/Information on Ingredients

Chemical Entity	CAS No	Proportion
Water	7723-18-5	>60%
Linear alkyl benzenesulfonate	proprietary	1-10%
Ethoxylated alcohols	proprietary	1-10%
Sodium Carbonate	497-19-8	<5%
Alkalis (hydroxides)	1310-58-3, 1310-73-2	<5%
Sodium tripolyphosphate	7758-29-4	<5%
Dipentene	138-86-2	<5%
Ammonia	7664-41-7	<1%
Ingredients not classed as hazardous under HSNO	proprietary	balance

### 4. First Aid

#### General Information

You should call the National Poisons Centre if you feel that you may have been harmed or irritated by this product. The number is 0800 764 766 (24 hr emergency service). If medical advice is needed, have product container or label at hand. Call a POISON CENTER or doctor/physician if you feel unwell.

Recommended first aid facilities      Ready access to running water.      Accessible eyewash is recommended.

#### Exposure

Swallowed:	Do NOT induce vomiting. If medical advice is needed, have product container or label at hand. Call a POISON CENTER or doctor/physician if you feel unwell.
Eye contact:	IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Apply continuous irrigation with water for at least 15 minutes holding eyelids apart. Immediately call a POISON CENTER or doctor/physician.
Skin contact:	IF ON SKIN: Wash with plenty of soap and water. If skin irritation or rash occurs: Get medical advice/attention. Wash contaminated clothing before reuse.
Inhaled:	IF INHALED: Call a POISON CENTER or doctor/physician if you feel unwell.

#### Advice to Doctor

No long term/permanent effects likely. Most likely effect is short-term irritation to skin or eyes (acute). Treat symptomatically

### 5. Firefighting Measures

Fire and explosion hazards	There are no specific risks for fire/explosion for this chemical. It is predominantly water and does not burn.
Suitable Extinguishing Substances	Water, foam.
Unsuitable extinguishing substances	None known.
Protective Equipment	Respiratory protection (to protect from smoke inhalation)
Danger caused by material, its combustion products or gases produced	Some fire decomposition products from this product may be harmful if inhaled.
Hazchem Code	1[T] (recommended - note: not a dangerous good)

6. Accidental Release Measures			
Containment	If greater than 1000L is stored, secondary containment is required. Emergency plans to manage any potential spills must be in place. Prevent spillage from spreading or entering soil, waterways or drains.		
Emergency procedures	The container size will generally prevent major spills. For small spill of liquid absorb with sand, vemiculite or similar and dispose of to an approved landfill site. If a large spill occurs: 1. Isolate area (ensure no persons inside spill area); 2. Collect spill – see below; 3. Transfer to container for disposal; 4. Dispose of according to guidelines below (Section 13)		
Clean-up method	This product is not considered flammable. Large spills can be collected by absorption onto material such as sand or similar. Larger spills should be prevented from entering storm water drains or waterways. Small spills can be wiped up and placed in a suitable container for waste disposal.		
Precautions	Spill site may be slippery. Wear protective footwear, overalls, gloves and safety glasses to clean-up large spills.		
7. Handling and Storage			
Storage:	Avoid storage of toxic substances with food. Store out of reach of children. Store in cool, dry, well ventilated area, removed from oxidising agents and acids. Ensure product is adequately labelled, protected from physical damage and sealed when not in use.		
Handling:	Keep exposure to a minimum, and minimise the quantities kept in work areas. See section 8 with regard to personal protective equipment requirements.		
8. Exposure Controls/Personal Protection Equipment			
<i>Workplace Exposure Standards</i>			
A workplace exposure standard (WES) has not been established by WorkSafe New Zealand for this product. There is a general limit of 10mg/m <sup>3</sup> for dusts and mists when limits have not otherwise been established.			
NZ Workplace Exposure Standards (2013).	Ingredient	WES- TWA	WES- STEL
	Ammonia	25 ppm	Data unavailable
	Sodium carbonate	10mg/m <sup>3</sup>	Data unavailable
	Sodium hydroxide	Ceiling: 2mg/m <sup>3</sup>	
	Potassium hydroxide	Ceiling: 2mg/m <sup>3</sup>	Data unavailable
	no other ingredients listed		
<i>Engineering Controls</i>			
Ventilation	In industrial situations, concentration values below the WES value must be maintained. Exposure can be reduced by process modification, use of local exhaust ventilation, capturing substances at the source, or other methods. If you believe air borne concentrations of mists, dusts or vapours are high, you are advised to modify processes or increase ventilation.		
<i>Personal Protective Equipment</i>			
Eyes	 Concentrated liquid may be discomforting to eyes – use eye protection if working with the concentrate.		
Skin	Avoid repeated or prolonged skin contact. If working with this substance in bulk, wear overalls, rubber boots and impervious gloves. Rubber or nitrile gloves are recommended. Replace frequently. Gloves should be checked for tears or holes before use. Remove protective clothing and wash exposed areas with soap and water prior to eating, drinking or smoking.		
Respiratory	Respirator is not required under normal use. Ensure adequate natural ventilation.		

9. Physical and Chemical Properties		
Appearance:	Opaque Off White liquid	
Odour	Characteristic odour	
PH	10.2 to 10.8	
Vapour pressure	18 mmHg at 20°C	
Vapour density	No data	
Boiling point	Approximately 100°C	
Freezing/melting point	< 0°C	
Solubility	Completely soluble in water	
Specific gravity or density	1.066 at 20°C	
Flash point	Not applicable (does not burn)	
Upper and lower flammable limits	Not applicable (does not burn)	
Auto ignition temperature	Not applicable (does not burn)	
10. Stability and Reactivity		
Stability	Stable. Unlikely to react or decompose under normal conditions	
Conditions to be avoided	No special precautions	
Incompatible materials	Oxidising agents (eg. Peroxides), Acids (eg. Sulphuric acid)	
Hazardous decomposition products	Carbon dioxide.	
Hazardous reactions	No specific hazards.	
11. Toxicological Information		
<i>Summary</i>		
IF SWALLOWED: may cause gastrointestinal discomfort.		
IF ON SKIN: may cause skin irritation. Some individuals may experience dermatitis.		
IF IN EYES: concentrate may cause burns to the eyes. The diluted mixture maybe irritating to the eyes.		
IF INHALED: no adverse effect is expected.		
<i>Supporting Data</i>		
Acute toxicity	Oral:	Using LD <sub>50</sub> 's for ingredients, the calculated LD <sub>50</sub> (oral, rat) for the mixture is between 2000 and 5000 mg/kg. Data considered includes: Potassium Hydroxide 273 mg/kg (rat), Dobanic (dodecyl benzene sulphonc acid) 404-1470 mg/kg body weight (rat), Sodium Tripolyphosphate 3020mg/kg (mouse), Sodium carbonate 4090 mg/kg (rat), Alcohols, C9-11, ethoxylated: 1400 mg/kg (rat),
	Dermal:	Using LD <sub>50</sub> 's for ingredients, the calculated LD <sub>50</sub> (dermal, rat) for the mixture is >5000 mg/kg. Data considered includes: Caustic Soda 1348 mg/kg.
	Inhaled:	No evidence of acute inhalation toxicity.
	Eye:	The mixture is considered to be corrosive to the eye, because some of the ingredients present at >3% are considered eye corrosives. (Alcohols, C9-11, ethoxylated, benzalkonium chloride, Dobanic (dodecyl benzene sulphonc acid)
	Skin:	The mixture is considered to be a skin irritant, because some of the ingredients present are considered skin irritants in more concentrated form. (see eye)
Chronic toxicity	Sensitisation:	The mixture is considered to be a contact sensitizer, because dipentene present in greater than 0.1% is known to be a contact sensitizer. (EPA CCID)
	Mutagenicity:	No ingredient present at concentrations > 0.1% is considered a mutagen.
	Carcinogenicity	No ingredient present at concentrations > 0.1% is considered a carcinogen.
	Reproductive / Developmental	No ingredient present at concentrations > 0.1% is considered a reproductive or developmental toxicant or have any effects on or via lactation.
	Systemic:	No ingredient present at concentrations > 1% is considered a target organ toxicant.
Aggravation of existing conditions	Some individuals with sensitive skin or conditions such as dermatitis may experience adverse skin reactions, and would be advised to wear gloves. If symptoms persist, discontinue use.	

12. Ecological Data			
<i>Summary</i>			
Limited data available on the mixture. This product is likely to be considered harmful to aquatic organisms.			
<i>Supporting Data</i>			
Aquatic	Ammonia is harmful to aquatic life at low concentration. Toxicity in Fish: 0.25 –8.2 mg/L. It does however biodegrade relatively quickly with a $t_{1/2}$ of 2 days. Sodium tripolyphosphate, like other phosphates, causes rapid growth of algae in surface waters, which can starve other organism of oxygen and cause environmental problems. Dipentene (present in this product at less than 5%) is classified under HSNO as 9.1A – ecotoxic: acute toxicity < 1.0mg/L.		
Bioaccumulation	Unlikely to be bioaccumulative (degrades in water)		
Degradability	Considered rapidly degradable (degrades in water)		
Soil	Ammonia is strongly absorbed to the soil.		
Terrestrial	No evidence of terrestrial vertebrate toxicity for the mixture.		
Vertebrate			
Terrestrial Invertebrate	No evidence of terrestrial invertebrate toxicity for the mixture or any of its components		
Biocidal	The product is not designed as a biocide.		
13. Disposal Considerations			
Restrictions	This product should not be disposed of directly to natural waterway.		
Disposal method:	For small amounts absorb with sand, vermiculite or similar and dispose of to an approved landfill site. For larger amounts (e.g. if >200L) contact emergency services. Prevent contamination of drains and waterways as aquatic life may be threatened and environmental damage may result.		
Contaminated Packaging:	Rinse containers with water before disposal. Preferably re-cycle container, otherwise send to landfill or similar		
14. Transport Information			
Transport according to NZS 5433 (Transport of Hazardous Substances on Land). There are no specific restrictions for this product (not a dangerous good).			
UN Number	Not applicable	Proper Shipping Name	Not applicable
Class(es)	Not applicable	Packing group	Not applicable
Precautions	Not applicable	HAZCHEM code	1[T] (not a dangerous good)
15. Regulatory Information			
This product is an approved substance under the Hazardous Substances and New Organisms Act (HSNO). Approval code: HSR002530, Cleaning Product (subsidiary hazard) Group Standard 2006.			
<i>Specific Workplace Controls (as per HSNO approval referenced to Controls Matrix)</i>			
Key workplace requirements are:			
SDS	To be available within 10 minutes in workplaces storing any quantity.		
Labelling	No removal of labels and/or decanting of product into other containers can occur.		
Emergency plan	Required if > 1000L is stored.		
Approved handler	Not required.		
Tracking	Not required.		
Bunding & secondary containment	Required if > 1000L is stored.		
Signage	Required if > 1000L is stored.		
Location test certificate	Not required.		
Flammable zone	Not required.		
Fire extinguisher	Not required.		
Note: The above workplace requirements apply if only this particular substance is present. The complete set of controls for a location will depend on the classification and total quantities of other substances present in that location.			
<i>Other Legislation</i>			
In New Zealand, the use of this product may come under the Resource Management Act and Regulations, the Health, Safety in Employment Act and Regulations, local Council Rules and Regional Council Plans.			

16. Other Information	
<i>Abbreviations</i>	
<b>Approval Code</b>	Approval HSR002530 Cleaning Products (Subsidiary Hazard) Group Standard 2006 Controls, EPA. <a href="http://www.epa.govt.nz">www.epa.govt.nz</a>
<b>CAS Number</b>	Unique Chemical Abstracts Service Registry Number
<b>Ceiling</b>	Ceiling Exposure Value: The maximum airborne concentration of a biological or chemical agent to which a worker may be exposed at any time.
<b>Controls Matrix</b>	List of default controls linking regulation numbers to Matrix code (e.g. T1, I16).
<b>EC50</b>	Ecotoxic Concentration 50% – concentration in water which is fatal to 50% of a test population (e.g. daphnia, fish species)
<b>EPA</b>	Environmental Protection Agency (previously known as ERMA)
<b>HAZCHEM Code</b>	Emergency action code of numbers and letters that provide information to emergency services, especially fire fighters
<b>HSNO</b>	Hazardous Substances and New Organisms (Act and Regulations)
<b>IARC</b>	International Agency for Research on Cancer
<b>LEL</b>	Lower Explosive Limit
<b>LD<sub>50</sub></b>	Lethal Dose 50% – dose which is fatal to 50% of a test population (usually rats).
<b>LC<sub>50</sub></b>	Lethal Concentration 50% – concentration in air which is fatal to 50% of a test population (usually rats)
<b>MSDS (SDS)</b>	Material Safety Data Sheet (or Safety Data Sheet)
<b>STEL</b>	Short Term Exposure Limit - The maximum airborne concentration of a chemical or biological agent to which a worker may be exposed in any 15 minute period, provided the TWA is not exceeded
<b>TWA</b>	Time Weighted Average – generally referred to WES averaged over typical work day (usually 8 hours)
<b>UEL</b>	Upper Explosive Limit
<b>UN Number</b>	United Nations Number
<b>WES</b>	Workplace Exposure Standard - The airborne concentration of a biological or chemical agent to which a worker may be exposed in a work day.
