DESCRIPTION

SPOTLESS is a concentrated liquid designed to clean kitchenware effectively in both hard and soft water areas.

SPOTLESS will remove difficult soils such as lipstick from glassware and crockery, then its' free rinsing properties will allow the ware to dry spotlessly, often without the need for a rinse additive.

When the tightest standards of hygiene and quality must be guaranteed we recommend the use of CLEAR rinse aid with SPOTLESS. Ware is then certain to be SPOTLESSLY CLEAR!

SPOTLESS contains sequestrates, deflocculating agents, peptising agents, soil suspending agents, purple dye, and a minimum of 120g/L sodium hydroxide.

DIRECTIONS FOR USE

WARNING: This product is highly alkaline: wear gloves, goggles and protective clothing if contact is likely.

- GENERAL DOSAGE: 2.0mL/L
- LIPSTICK REMOVAL: 5.0mL/L
