- **CLEAR WATER WHITE LIQUID**
- **pH 13 ± 0.5**

AREAS OF USE:

- **FOOD INDUSTRY**
- **FOOD/BEVERAGE/DAIRY FACTORIES**
- **GENERAL CONTACT SURFACES EXCEPT CIP**

DESCRIPTION

SPRAY KLEENA is a highly versatile multipurpose cleaner which may replace a wide range of both general and specialist cleaning products designed to remove grease and oil. It is a clear water white liquid with pH of 13.0 ± 0.5 and solids of greater than 16.5% when measured by refractive index.

Where SPRAY KLEENA can replace more than one specialist cleaning product then savings can usually be made on both the cost per litre used and on the reduced inventory cost incurred when stocking one product instead of two or more.

SPRAY KLEENA possesses excellent detergency to enable normal food industry cleaning functions to be performed at low dilutions, yet can be used neat to solve tough problems such as removing "hard" body soaps from plastic bathroom fixtures without abrasives.

SPRAY KLEENA contains anionic and non-ionic surfactants, solvents, chelating agents and soil suspending silicates.

DIRECTIONS FOR USE

General Cleaning	1% Buckets, sprays and foamers.
Rendering Areas	10% Spray or scrub on, hot hose off.
Engine Cleaning	10% Heat engine, spray on, hose off.
Laundry	5% Pre-soak, neat for spotting.
Upholstery	4% For spray/wiping, neat for tar removal.
Bathrooms	Use neat to remove body soap build-up.
Windscreens	2% Add to car windscreen washers.
Oven Cleaning	30% Preheat to 175 °C, spray on, leave 30 mins then wipe clean.
Garage Floors	Scrub in neat, wait 5 mins, hose clean.

SAFETY INFORMATION

- **INGESTION:** Do not induce vomiting, drink two glasses of water then call doctor.
- **EYE CONTACT:** Flush immediately with cool water and continue rinsing for 15 minutes.
- **SKIN CONTACT:** Flush with cool water until the soapy feeling disappears.
