- **CLEAR APPEARANCE**
- **MILD ODOUR**

AREAS OF USE:

- **GRAFFITI**
- **SPOT REMOVAL**
- **LAUNDRY**
- **CARPETS**
- **PAINT STRIPPING**

DESCRIPTION

VANISH will remove graffiti, ink, paint, grease, oil, and many other deposits that are hard to remove with water based cleaning systems. It is based on the safest and most environmentally friendly solvents capable of dissolving a wide spectrum of films and deposits.

VANISH will remove many unsightly marks safely thus what were thought of as tough problems will simply disappear!

VANISH is a blend of non-toxic solvents plus an alcohol based detergent to create a product that is moderately flammable, non-toxic, and biodegradable. Personal hazards have been eliminated except for its actual solvent action - VANISH will defat skin and will be very upsetting if swallowed.

VANISH may be identified by its clear mobile appearance and its mild odour.

DIRECTIONS FOR USE

- **GRAFFITI:** Spray undiluted VANISH at the graffiti with force. Wipe the surface with a cloth, then rinse with water to halt any further stripping action if the surface is painted.

NB: surfaces must be dry initially for VANISH to be effective.

CAUTION: Take care with painted surfaces. Rinse until rinse water is no longer foamy to halt stripping action completely.

- **SPOT REMOVAL:** VANISH may be used as a spot removal solvent in laundry and carpet cleaning operations, however care must be taken initially because VANISH may dissolve or soften some synthetic fibres such as acrylics.
- **PAINT STRIPPING:** VANISH may be used as an immersion type paint stripper. Soak times of over one hour will be needed for some paints.

SAFETY INFORMATION

- **SKIN CONTACT:** Remove contaminated clothing and wash skin thoroughly.
- **EYE CONTACT:** Rinse immediately with cool water for 15 minutes. Call doctor.
- **INGESTION:** Do not induce vomiting. Drink 2 glasses of milk, water or fruit juice. Call doctor or National Poisons Information Centre.
