DESCRIPTION

WOOLPRIDE LOW FOAM CARPET is a highly concentrated carpet shampoo, researched and developed by The Wool Research Organisation of New Zealand (Inc.).

WOOLPRIDE LOW FOAM CARPET SHAMPOO concentrate is recommended for use in hot water extraction equipment. It is specifically designed for all wool and wool rich carpets.

WOOLPRIDE is the only carpet shampoo researched and developed by the Wool Research Organisation of New Zealand (Inc) and carries their stamp of approval for quality and excellence.

Some of its features include that it:

- Contains biocides to kill and prevent mould growth
- Has a subtle fragrance
- Is non-alkaline: pH is about 8.0 ± 0.5 when diluted with tap water.

DIRECTIONS FOR USE

Dilute one part of the shampoo concentrate with 99 parts of hot water. It is preferable to dilute the shampoo in a

separate container prior to adding to the machine to allow thorough mixing. After cleaning, ensure the carpet is dry before walking on and vacuum thoroughly to restore pile.

It is desirable to test an unobtrusive area of carpet with the working strength shampoo to ascertain the colourfastness.

Avoid over wetting of carpet.

For pre-spotting dilute one part Woolpride Low Foam with 20 parts water.

SAFETY INFORMATION

- **SKIN:** WOOLPRIDE LOW FOAM is not hazardous to most skin types but do rinse off with cool water as soon as possible.
- **EYES:** Flush with cool water for 15 minutes.
- **INGESTION:** Do not induce vomiting. Drink 2 glasses water then call Doctor.
