

Product Information

SHOWERGLOSS

Showergloss is a mildly acidic general purpose hard surface sanitising cleaner, specially formulated for use on stainless steel, aluminium, ceramic, fibreglass, plastic and laminated surfaces to remove stains, calcium scale and soapy or greasy deposits, producing a sharp, clean, shining finish.

Showergloss is ideal for baths, showers, hand basins, tubs etc. Not recommended for use on marble surfaces or on acrylic showers or baths.

◆ DIRECTIONS:

Apply Showergloss to the surface to be cleaned with a damp cloth or sponge. Saturate the area to ensure thorough dissolution of congealed soap scum stains etc. After 2-3 minutes Showergloss should be rinsed away using a damp cloth and liberal amounts of fresh water.

Note: Lengthy exposure to Showergloss of old or poor quality painted surfaces may cause paint damage. For all painted surfaces rinsing should follow immediately after application of Showergloss. Showergloss may attack acrylic surfaces and is not recommended in such situations.

◆ BIODEGRADABLE:

The surfactants in this product are biodegradable according to internationally accepted criteria.

◆ PRESENTATION:

Showergloss is available in the following pack sizes:

- 500ml spray bottle
- 5 litre
- 20 litre
- 200 litre containers

◆ NZFSA APPROVAL:

Showergloss is NZFSA Approved C32 (All animal product except dairy)

◆ HAZARDS:

Harmful if swallowed or vapours inhaled. Showergloss is safe to use as directed. However care should be taken to ensure adequate ventilation when using in confined spaces as inhalation of concentrated fumes could cause irritation.

◆ FIRST AID:

If swallowed: do not induce vomiting. Rinse mouth with water. Seek medical assistance.
For eye or skin contact: flush with water. If irritation develops seek medical attention.

A Safety Data Sheet is available for this product on request.
