Suma® Combi+ LA6

Liquid machine dishwash detergent
with built-in rinse-aid

Suma® Combi+ LA6 uses new innovative technology to combine a concentrated liquid mechanical ware washing detergent and rinse aid in one. It is specially formulated to provide soil removal for up to 215 ppm water hardness conditions and provides optimum drying performance.

Key properties

Suma® Combi+ LA6 is a heavy duty alkaline liquid detergent and rinse aid all in one, which is suitable for use in a wide range of single tank or front loader washing machines (no conveyor or multi-tank). It contains a blend of caustic alkali and scale control agents, which will provide soil removal. The high level of powerful scale control agents will also prevent scaling for up to 215 ppm water hardness conditions. Because of the unique innovative rinse aid additive changing the behaviour of the water there is no need for a separate rinse aid.

Benefits

- ▶ New innovative technology provides a detergent and rinse aid all in one product.
- ▶ Ensures quick drying.
- ▶ Cuts through grease and dried-on food.
- ▶ Being highly concentrated gives greater economy in use.
- ▶ Prevents scaling of the dish wash machine even in up to 215ppm water hardness conditions.
- ▶ Gives streak and spot-free results.
- ▶ Chlorine free.
- ▶ Phosphate free.

Designed For

- ▶ Hospitality
- ▶ Lodging
- ▶ Healthcare
- ▶ Food Service

Instructions for Use:

Suma Combi+ LA6 is normally applied using Diversey Care automatic dispensing equipment. It can however be used in conjunction with an integral dosing pump. To ensure perfect cleaning results in up to 215 ppm water hardness conditions, dose at a concentration of 1 - 4 ml/litre, depending on local site conditions. At 2 ml/litre, this will prevent scale deposits in water containing up to 125 ppm CaCO₃.

The product is not suitable for systems where currently an acidic rinse aid is used as a descaler, and where a detergent to rinse aid dosage is below 2:1. At first use, rinse pump, and transport tubes of the dosing system to avoid possible crystallisation in these tubes caused by mixing of products and empty the rinse line.

Product Specifications

Description	
Appearance	Clear yellow liquid
pH (1% soln)	12.5
Specific gravity	1.28

Available Items

Code	Description	Pack Size	Dilution	Availability
7521465	Suma Combi+ LA6	2x5L	1-4ml/L	NZ

These figures are typical values and should not be interpreted as specifications.

Safe handling and storage information

Full guidance on the handling and disposal of this product is provided in a separate Material Safety Data Sheet. Store in original container. Avoid extremes of temperature.

Product Compatibility

Under recommended conditions of use, Suma Combi+ LA6 is suitable for use on most materials commonly encountered in the kitchen. Do not use on alkali sensitive items such as copper, brass, aluminium or rubber.
